

## Input

Terpenoids  
Phenylpropanoid  
GLVs, MeSA,  
MeJA, and indole

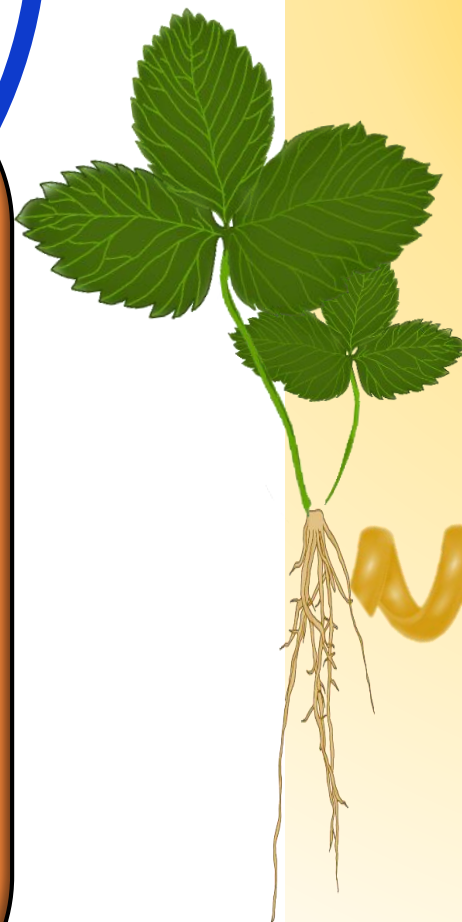

## Transferring

I. Wireless communication by  
VOC and root exudates

II. Wire communication by  
mycorrhiza, fungi, and  
parasitic plants

Root exudates  
(e.g. SA, BZ)  
↓  
Microbiome  
modulation

## Output

VOC receptor/convertor
