Keywords:

forest, structural feature, tree height, root depth, sapflow density, resistance, droughts, heatwaves, Europe, greedy algorithm, water use strategy

The type of article: Letters

The number of words in the abstract: 150 words

The number of words in the main text: 4409 words

The number of references: 64

The number of figures, tables, and text boxes:

5 figures in Manuscripts

8 figures and 2 tables in supporting information
