

TABLE 6. Participant transition and intervention experiences

Participant's experience of interaction with their healthcare provider regarding transition –	Baseline survey	Exit survey	<i>p-value</i>¹
Percentage reporting (N=56)	% (N)	% (N)	
• Pediatric health care provider (PHCP) and/or staff discussed with/informed you at what age you may need to change to a new provider who treats mostly adults	55.4 (31)	98.2 (55)	<.0001
• Talked with your PHCP without your parent or guardian in the room	69.6 (39)	83.9 (47)	0.115
• PHCP actively worked with you to gain skills to manage your own health and health care (some/a lot vs not at all/a little)	71.4 (40)	94.6 (53)	0.001
• PHCP worked with you to think about and plan for the future (some/a lot vs not at all/a little)	55.5 (31)	87.5 (49)	0.001
• PHCP explained legal changes in privacy, decision-making, and consent that take place at age 18	48.2 (27)	91.1 (51)	<.0001
• PHCP actively worked with you to create a written plan to meet your health goals and needs	32.1 (18)	76.8 (43)	<.0001
• PHCP created and shared with you your medical summary	67.9 (38)	92.9 (52)	0.003
• Know how you will be insured as you become an adult	16.1 (9)	78.6 (44)	<.0001
• PHCP assisted you in identifying a new adult provider to transfer to	23.2 (13)	60.7 (34)	<.0001
Satisfaction with TN Intervention mean score (0-10)	Baseline survey	Exit survey	<i>p-value</i>²
	Mean (sd)	Mean (sd)	
	4.4 (1.6)	7.6 (2.5)	<.0001

¹ Based on paired comparisons using McNemar Tests; ² Based on paired t-test
