

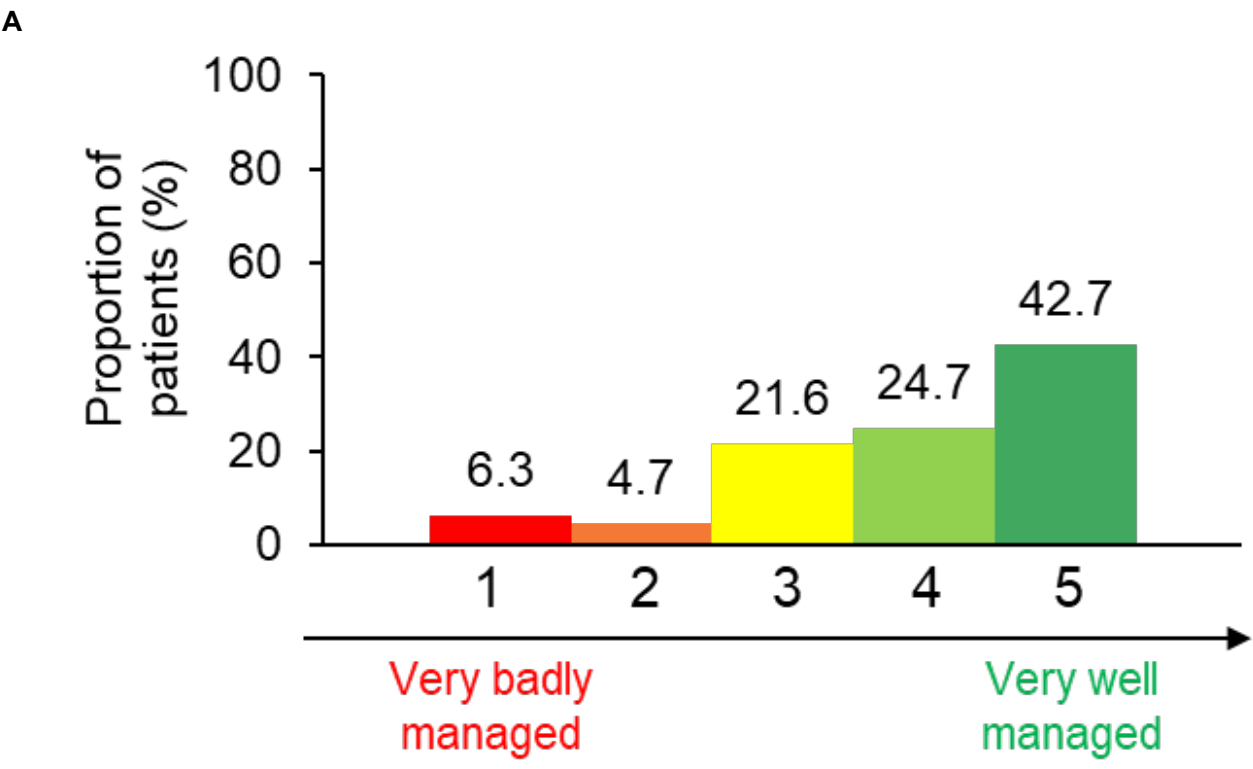

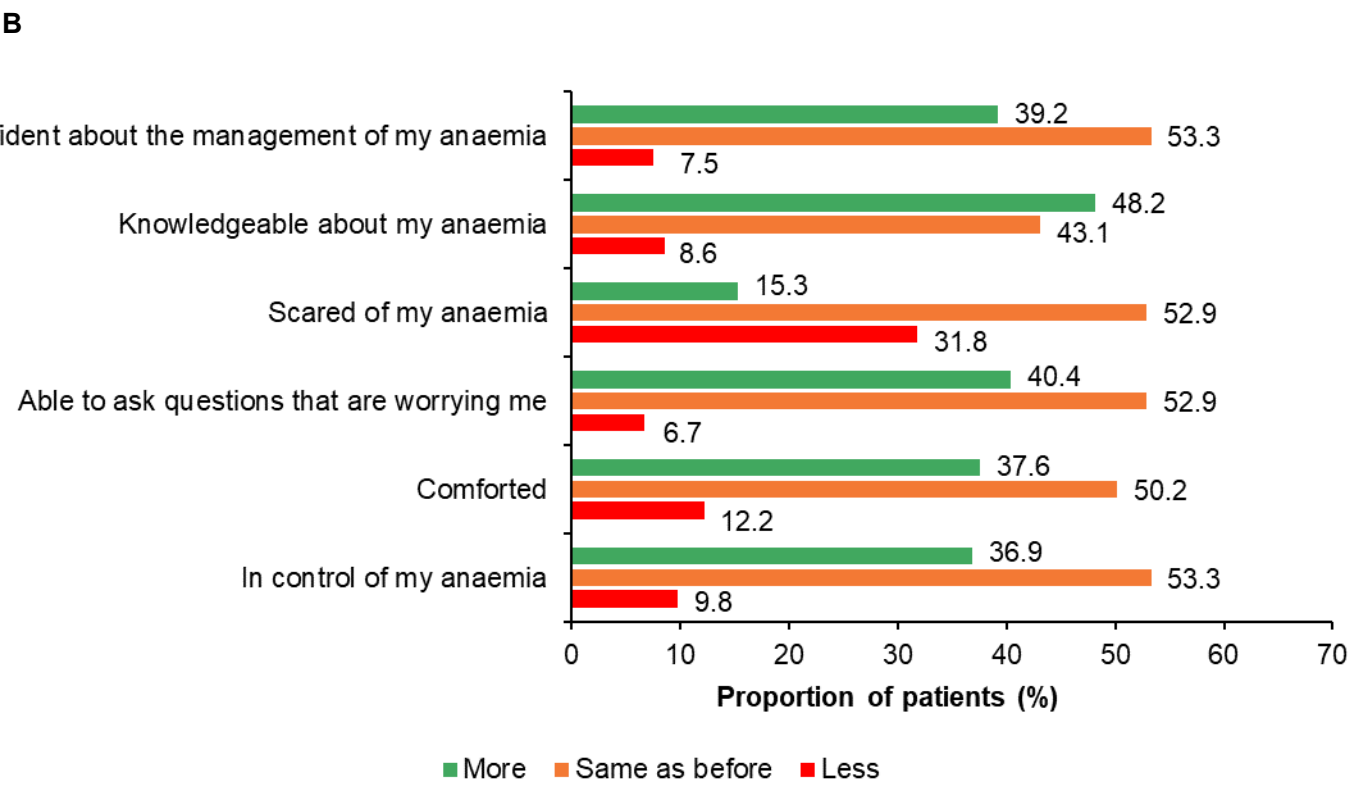

**Figure 5. For the anaemia cohort (n = 255): (A) Patient perceptions of how well their anaemia was being managed, and (B) impact of discussing anaemia in CKD with HCPs**

Patients were asked the following question 'On a scale from 1 to 5, how well do you think your anaemia is managed, with 1 being 'very badly managed', 3 being 'neither badly nor well managed', and 5 being 'very well managed'?'

Abbreviations: CKD, chronic kidney disease; HCP, healthcare provider.  
Patients were asked the following question 'After your discussions with your doctors about anaemia, no matter how small, how do you feel?'
