

Table 3. The relationship between different procedure / the distance of tumor margin and tumor recurrence

Parameter	Local recurrence	Pulmonary metastasis	Bone metastasis	Cases ( %* )
Types of hepatic resection #				
Trisectionectomy	2	1	0	3 ( 42.9% )
Extended hemihepatectomy	0	1	0	1 ( 12.5% )
Irregular hepatectomy	0	0	0	0
Mesohepatectomy	1	0	0	1 ( 8.3% )
ALPPS procedure	0	1	1	2 ( 50.0% )
Tumor margin distance &				
> 1 cm	0	0	0	0
0.5 ~ 1 cm	1	2	0	3 ( 21.4% )
< 0.5 cm	1	0	0	1 ( 14.3% )
Close to tumor margin	1	1	1	3 ( 50.0% )

\* : Percentage of total cases in this category ; # : P=0.352 ; & : P=0.932
