

Table 4.2. Questions based on interpretation about the COVID-19 outbreak and cancer

Questions (same order in the questionnaire)	Responses					
	n	%	n	%	n	%
15. What do you think about the control tests in patients with cancer who are being followed up during the COVID-19 epidemic period?	24	10.9	85	38.6	11	50.5
	I prefer to postpone control examinations due to the risk of COVID-19 contamination.		I would like to have my tests scheduled		I prefer to have my follow-up doctor do when it deems appropriate.	
17. Are you concerned about the continuation of your cancer treatment during the period of the COVID-19 outbreak?	110	50	110	50		
	Yes		No			
18. If your answer to question 2 is yes, which of the following do you worry more about?	80	72.7	30	27.3		
	COVID-19 transmission scares me more than disruption of my cancer treatment		Disruption of my cancer treatment scares me more than the COVID-19 transmission.			
22. How many relatives accompany you when you come to the polyclinic?	32	14.5	160	72.7	28	12.7
	I'm coming myself		one relative accompanies		two relatives accompany
