

TABLE 5: Adjusted generalized linear model for total healthcare costs in the first year following ALL diagnosis

Model Parameters^a	Cost Ratio^b	95% Confidence Interval (Lower, Upper)	P-value
Commercial (versus Medicaid)	1.60	1.50, 1.72	<0.0001
Age (10-20 years versus 0-9 years)	1.89	1.67, 2.16	<0.0001
Gender (male versus female)	1.08	0.95, 1.22	0.2352

^aIntercept parameter estimate is 12.4129; ^bExponentiated parameter estimate
