

TABLE 5 Analysis of infections and bleedings (n=110)

Bleedings ¹	22 (20 %)
Cerebral	7 (6.4 %)
Gastrointestinal	15 (13.6 %)
Infections ²	47 (42.7 %)
Severe systemic infection	13 (11.8 %)
Pneumonia	17 (15.5 %)
Meningitis	2 (1.8 %)
Splenic abscess	2 (1.8 %)
Gluteal abscess	1 (0.9 %)
Abdominal abscess	1 (0.9 %)
Pathogen not isolated	25 (22.7 %)
Pathogen isolated ²	22 (20.0 %)
Escherichia coli	15 (13.6 %)
Klebsiella pneumoniae	6 (5.5 %)
Cryptococcus neoformans	2 (1.8 %)
Pseudomonas aeruginosa	1 (0.9 %)
Pneumocystis jirovecii	1 (0.9 %)

¹ 7 patients suffered from both hemorrhage and an infection when they died

² 3 patients had overlapping infections with 2 different pathogens at the same time
