

Fig. 7 The protein level and transcription level of *AtICE1* in Arabidopsis lines under freezing stress. (A) Protein level of *AtICE1* in Arabidopsis lines under freezing stress. (B) Labeled *AtICE1* bands were quantified using Q9 Alliance software. (C) Transcription level of *AtICE1* in Arabidopsis lines under freezing stress. All values in the figure are mean \pm SD ($n = 3$), P values (protein content versus WT, expression of *AtICE1* versus 24°C) were calculated with one-way or two-way ANOVA, * $P < 0.05$, ** $P < 0.01$, *** $P < 0.001$, **** $P < 0.0001$.
