

Figure 1. Logistic equation fitting of the reduction in yield and yield components under waterlogging stress. Reduction in pod yield per plant (A), total pod number per plant (B), full pod number per plant (C), 100-pod weight (D), 100-kernel weight (E). Note: RPY: pod yield reduction; RTP: total pod number reduction; RFP: full pod number reduction; RHPW: 100-pod weight reduction; RHKW: 100-kernel weight reduction.
